

▶ Polycom® HDX 8000™ Series

Flexible-high definition video, voice,
and content communication

High-definition visual communication solution for
conference rooms, classrooms and meeting places worldwide

For organizations migrating to high-definition video and audio communication, Polycom® HDX 8000™ Series systems provide a flexible and robust solution ideally suited for distance education, remote medical diagnosis, on-demand project collaboration and more.

Precisely Engineered for Superior Clarity

The clarity of Polycom HDX 8000 Series systems enables users to interact over video freely and naturally, and with the HDX 8000 Series systems' embedded multipoint and content-sharing capabilities, remote team members can quickly and easily be brought together collaborate on projects visually in this superior telepresence solution.

Designed to high-definition standards, Polycom HDX 8000 Series systems solutions utilize Polycom HD Voice™ technology to convey distortion-free voices and sounds, while Polycom StereoSurround audio technology separates room sounds into left and right channels, giving an immediate sense of the physical location of opposite-end participants.

Rich-Media Presentations Made Easy

For media-rich group presentations, Polycom HDX 8000 Series systems enable users to display rich-media content and data easily, enhancing collaboration and audience participation. And utilizing Polycom HDX 8000 Series systems in tandem with Polycom's unique People On Content™ collaboration technology allows presenters to insert their video images into projected content to explain key elements more clearly.

Polycom HDX 8000 Series systems are a key element of the total Polycom visual communication solution, which includes seamless integration with the Polycom RMX 1000™ or RMX 2000™ conference platforms, Polycom Converged Management Application™ 5000 for management and scheduling, or the Polycom SoundStation® IP 7000 conference phone for an integrated voice and video experience.
